Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claims 8, 9 and 13 are objected to because of the following informalities: in claim 8, a "protrusion" is a double inclusion to the pawls claimed in claim 2; likewise, in claim 9, a "plurality of pawls" is also a double inclusion; and finally, in claim 13, the "octagonal shape" is also a double inclusion. It appears that the above referenced claims may have been intended to only dependent from only claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Leistner (US 6,183,181). Leistner discloses a T-nut having a cap at the end including the flange. Leistner further provides a space between the cap and the threads.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3677

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leistner as applied to claims 1 and 2 above, and further in view of Vermillion (US 5,609,351). Leistner does not disclose the cap formed as a single piece with the remainder of the nut. Vermillion discloses a T-nut (10) having a capped end (see Fig. 6) formed as a single piece with the remainder of the nut. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to provide the cap of Leistner as a single piece as disclosed in Vermillion in order to facilitate manufacture. The single piece nut and cap would not require the separate cap and the installation thereof thus making for more efficient manufacturing.

Claims 3-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leistner. The examiner takes notice that the various configurations of the T-nut as claimed are known each having its' own advantages for particular applications as exemplified in multitude of prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
